

DIRECTIONAL CONTROL VALVES () - proof II 2 GD, EEx d IIC T5 HD5-EX 150 I/min 32 MPa (320 bar)

1 DESCRIPTION

HD5-EX-** Ex proof electrically are pilot operated 4 way valves of size ISO 05 with mounting surface according to Cetop 4.2-4 P05-320 Characteristics of the Ex proof, electrically operated, pilot valve type HD3-EX-** are described on Aidro table HD-3EX rev.

2 ORDERING CODE

(1)		(2)		(3)		(4)		(5)		(6)		(7)		(8)
HD5	-	EX	-		-		-		-		-		/	40

- (1) HD5: 4-way directional control valve Cetop 05- Pressure 32 MPa (320 bar)
- (2) Variants:
 - EX: electrically controlled, EX Proof ATEX HH: hydraulically piloted (main body)
- (3) Spool type:
 - -number is the main spool type
 - -letter is the solenoid or spring arrangement:
 - C: 2 solenoids, spool is spring centered (3 position)
 - LL : 1 solenoid (a), spool is spring/hydr. offset (2 position, end to end)
 - ML: 1 solenoid (a), spool is spring offset (2 position, middle to end)
 - LM: 1 solenoid (a), spool is spring offset (2 position, end to middle)
 - b: only for versions LL, MI, LM see also functional symbols
- (4) Location of X and Y ports.

no designation: standard, according to CETOP 4.2-4 P05-320 R05: according to CETOP 4.2-4R05-320 and ISO/ CD 4401-05

- (5) Code reserved for options and variants
 - C: adjustable limits for main spool stroke
 - D: double flow control valve to adjust shifting speed
 - G: adjustable limits and adjustable shifting speed
- (6) Pilot and drain arrangement
 - no designation: internal pilot and external drain (standard)
 - I : internal pilot and internal drain
 - E: external pilot and external drain

(7) Electric voltage and solenoid coils

- 012C : coils for V12DC 024C : coils for V24DC 115A : coils for V110/50 - V 115/60 AC 230A : coils for V220/50 - V 230/60 AC See also electric characteristics
- (8) Design number (progressive) of the valves

3 TECHNICAL DATA

max recommended flow (spring centering)	150 l/min
Maximum pressure (P,A,B)	32 MPa (320 bar)
Maximum pressure at T port (internal drain)	16 MPa (160 bar)
Maximum pressure at T port (external drain)	25 MPa (250 bar)
Pilot pressure minimum	0,5 MPa (5 bar)
Pilot pressure maximum recommended	20 MPa (200 bar)
Dimensions and installation	see 6
Mass	Approx 9,00/10,2 kg

Note:

When valves HD5-EX-** are made with internal pilot and internal drain ("I" configuration), ports X and Y are not used and valves can be installed on normal 05 surface mounting plates according to ISO 4401-05.

4 PRESSURE DROP

∆p-Q

Measured at v= 166 SUS (35 mm²/s) and t= 122 °F (50 °C)

∆p bar

Control of the main spool stroke: C

It is possible to introduce special stroke controls in the heads of the hydropiloted valve so as to vary the maximum spool stroke. This solution allows control of the flow rate from the pump to the actuator and from the actuator to the outlet, obtaining a double adjustable control on the actuator. Add the letter **C** to the identification code to request this device.

Control of the main spool shifting speed: D

By placing a double flow control valve between the pilot solenoid valve and the hydropiloted valve, the piloted flow rate can be controlled and therefore the shifting speed can be varied. Add the letter **D** to the identification code to request this device.

Control of the main spool stroke and shifting speed: G

It is possible to have the valve fitted with both the spool stroke device and the piloting flow rate control device. Add the letter ${\bf G}$ to the identification code to request this solution.
