ECS10A

Sectional directional control valve

TYPICAL CURVES

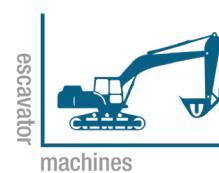

All performances are obtained using mineral based hydraulic oil 46 cSt viscosity at 40°C (ISO VG46 viscosity class). All ECS10A go through functional testing at these conditions before shipment.

APPLICATIONS

EBI motion controls provides a broad choice of directional control valves expertly developed and tested to meet different market sectors' needs.

ECS10A are suited for specialized applications for a variety of mobile equipment such as:

OPTIONAL FEATURES

- The mechanical joystick control and the double side actuation are available on request.
- All outlet section ECS10A can be easily transformed from simple T port to HPCO configuration just by installing two conic plugs.
- On request all ECS10A directional control valves by EBI can be delivered painted (RAL 9005 black primer).
- To improve performance and controllability, a full range of hydraulic remote controls (joysticks and foot pedals) is available (see ESJ01A, ESJ02A, ESP02B, ect.).
