

# KGD/AE

The piston seal type Aston Seals KGD/AE is composed of:

- A sealing rubber element with low permanent deformation which assures good sealing performance. Three compact and small seal edges ensure perfect fluid control and concentrate load against the dynamic surface. The cavities between the external seal edges keep small quantities of fluid reducing friction and wear. The special geometry of static side guarantees a wide contact area and prevents distortion inside the groove during installation
- Two internal anti-extrusion rings with stabilizers to avoid the rotation of the rubber element. A special geometry of grooves assures that pressure loads the energizing seal

element without any risk of extrusion of it.

- Two backup rings which offset large gaps or structural deflections without extrusion and assure high longevity
- Good sealing performance as well as at low pressure
- Simple one-part piston design
- High resistance against extrusion
- Perfect fluid control
- Good mechanical stability at high temperature
- Easy installation without expensive auxiliaries
- Good temperature resistance
- Easy installation on a solid piston

## MATERIAL

(1) Type Designation Hardness	Nitril Rubber NBR RUBSEAL 75 75 °ShA
(2) Type Designation Hardness	Thermoplastic polyester resin SEALITE 63 63 °ShD
(3) Type Designation	Acetal resin BEARITE

## FIELD OF APPLICATION

Pressure $\leq 400$ bar	0 bar   100   200   300   400   500   600   700
Speed $\leq 0.5$ m/s	0 m/s   2   4   6   8   10   12   14
Temperature $-40^{\circ}\text{C} \div +110^{\circ}\text{C}$	-200   -150   -100   -50   0 °C   50   100   150
Fluids	Hydraulic oils (mineral oil based) For other fluids contact our technical department

## SURFACE ROUGHNESS

Dynamic surface	$\text{Ra} \leq 0.3 \mu\text{m}$	$\text{Rt} \leq 2.5 \mu\text{m}$
Static surface	$\text{Ra} \leq 1.6 \mu\text{m}$	$\text{Rt} \leq 6.3 \mu\text{m}$

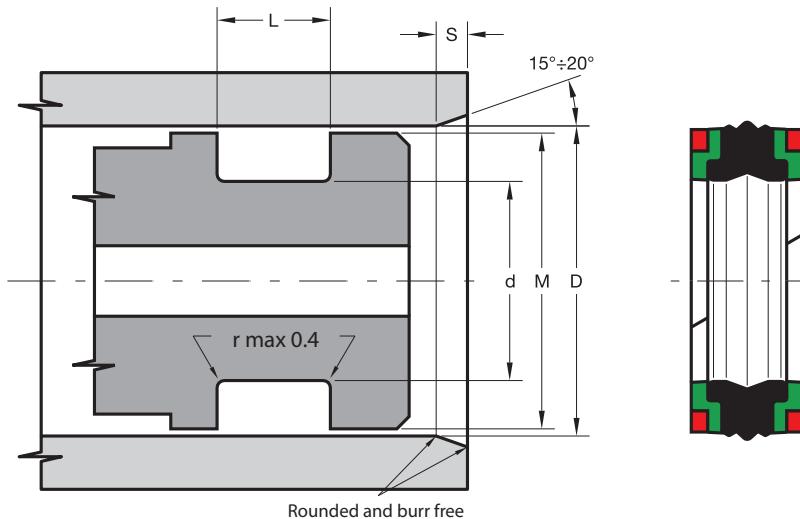

## LEAD-IN CHAMFERS

d	Smin
less 100	5 mm
100÷200	7 mm
over 200	10 mm

To avoid damaging the sealing lips during installation, housing must have rounded chamfers. Sharp edges and burrs within the installation area of the seal must be removed.

The above data are maximum values, they may be maintained for short periods and can not be used at the same time simultaneously.
