Description:

Hydraulic foot pedal series PH are proportional remote control operating by the principle of the direct action reducer valves.

They can work up to 100 bar supply pressure and a maximum 60 bar control pressure, flow range from 5 to 15 l/min and they are suitable for the remote control of main valves, proportional valves, servo controls for the adjustment of hydraulic pump and motor variable displacement, hydraulic clutches and brakes.

The consumed energy is extremely low, very little maintenance is needed, the anti-oscillation system of the control lever and the reduced operating force minimize the operational costs and optimize the working sensitivity and comfort.

The robust control device, the galvanized cast iron body, the wide range of metering curves, the possibility to assemble all our range of multifunction ergonomic handles with on-off and proportional hall effect rollers, the availability of straight and bent rubber boots, the check valve block for translation control, make this product flexible and reliable for the heaviest application: from agricultural to earth moving machine, from the naval to industrial applications.

Technical features:

Minimum input flow:	5 l/min
Maximum input flow:	15 l/min
Maximum input pressure (P):	100 bar
Maximum output pressure (1,2,3,4):	60 bar
Maximum tank counter pressure (T):	3 bar
Maximum hysteresis:	0,5 bar
Internal leakage:	1,5 ÷ 3,0 cc/min @ 30 bar
Fluids:	Mineral hydraulic oils HL, HLP DIN 51524
Fluid temperature range:	- 20 ÷ + 80 °C
Ambient temperature range:	- 40 ÷ + 60 °C
Fluid viscosity range:	10 ÷ 300 cSt
Fluid contamination class:	21/16/13 ISO 4406
Body material:	Cast iron
Plunger materials:	Stainless steel
Plunger guide material:	Brass
Body surface treatment:	Galvanization
Ports:	1/4" ISO 228/1; 9/16"-18 UNF-2B ISO 11226

The data and the technical features in this catalogue are not binding. The manufacturer reserves the right to carry out modifications, by its unquestionable judgement and without prior notice, in order to improve its products. The manufacturer is not responsible for damage to people or properties caused by an improper use of the product.

THE COMPREHENSIVE RANGE OF MANUFACTURED AND MARKETING COMPONENTS INCLUDES:

- Hydraulic gear and axial piston pumps & motors
- Directional control valves & selector valves
- Proportional EH pressure reducing valves & manifold blocks
- Hydraulic, pneumatic and electric on-off & proportional joysticks
- Control electronics
- Radio controls, push buttons stations, dashboards and armrests
- Multifunction ergonomic, cylindrical & palm grips
- Hydraulic filters & contamination control systems
- Heat exchangers and cooling systems
- Fluid monitoring & diagnostic instruments
- Bell housings, driving flanges & elastic couplings
